Que: Jethalal, Sunderlal and Taarak Bhai started a business in partnership, the name of their organization is "**Sundar Taxi Ka Bhada Dega Private Limited**", their efficiency ratio is 7 : 11 : 13 respectively. Overall profit of their organization is Rs. 10,85,000. Find Sunderlal's share in the profit.

Handwritten solution:

Overall profit: 10,85,000

Ratio: 7 : 11 : 13

Sum of parts: $7 + 11 + 13 = 31$ parts

1 part = $\frac{10,85,000}{31} = 35,000$

Sunderlal's share (11 parts): $11 \times 35,000 = 3,85,000$

Jethalal's share (7 parts): $7 \times 35,000 = 2,45,000$

Taarak Bhai's share (13 parts): $13 \times 35,000 = 4,55,000$

Total: $3,85,000 + 2,45,000 + 4,55,000 = 10,85,000$

Que: Jethalal, Sunderlal and Taarak Bhai started a business in partnership, the name of their organization is "**Sundar Taxi Ka Bhada Dega Private Limited**", their efficiency ratio is 7 : 11 : 13 respectively. Overall profit of their organization is Rs. 10,85,000. Find Sunderlal's share in the profit.

$$\begin{array}{l} 10,85,000 \\ \swarrow \quad \searrow \\ 7 \quad 11 \quad 13 \end{array}$$
$$\frac{13}{31} \times 10,85,000$$
$$\frac{11}{31} \times 10,85,000 = \frac{35,000}{385,000}$$
$$\frac{7}{31} \times 10,85,000$$
