

Que: It was the school exam day, Tappu Sena caught the school bus. They enjoyed traveling by bus. Moving at 6 mph, the bus took them to college at the right time. They finished their exam and had a chit chat with their friends and suddenly they realized that it was 6 pm and they had missed the college bus. They decided to walk back home at 4 mph. What is their average speed for the day? Asked in **TCS NQT** 2018
