ADULTAREOUS

What does *adulterous* mean?

×

Adulterous is used to describe a person who engages in or a relationship that constitutes *adultery*—a consensual sexual relationship or encounter between someone who's married and a person they're not married to (who may or may not be married to someone else).

In other words, adultery can be between two people who are both married to other people, or between a married person and a nonmarried person. Typically, for something to be considered *adulterous*, at least one of the partners must be married.

On the other hand, similar words like *cheating*, *infidelity*, and *unfaithfulness* can be used regardless of whether either person is married—they simply refer to a (usually sexual) relationship or encounter between people when one or both of them is in a committed relationship with someone else.
